

Agenda
Task Force on Renewable Energy Development and Siting Tour

November 15, 2019
11:45 AM – 4:30 PM

The Task Force will tour and discuss the following locations:

1: Wye Mills Solar, Queen Anne's County

Wye Mills Solar Project, with a capacity of 13.6 MW, serves Johns Hopkins Medicine's East Baltimore Campus. The solar installation features more than 40,000 solar panels across a 97-acre plot of land.

2: Maryland Environmental Service Headquarters, Anne Arundel County

At Maryland Environmental Service headquarters in Millersville, Maryland, a 600KW solar array over parking lots generates renewable energy on the site.

3: Annapolis Solar Park, Anne Arundel County

The Annapolis Solar Park has a production capacity of 18 mega-watts of electricity from the 55,000 solar panels on the 80-acre closed Annapolis Landfill. Power purchasing agreements with the City of Annapolis, Anne Arundel County, and the Anne Arundel County Board of Education support the project.
